EDUCATION

Addis Ababa Science and Technology University (AASTU)

B.Sc. in Software Engineering

2023 – 2028 | Addis Ababa, Ethiopia

- Currently in my 4th year and progressing to my 5th (final) year in 2027, pursuing a Bachelor's degree (Expected Graduation: 2028)

.

RELEVANT COURSEWORK

- **Data Structures and Algorithms:** Fundamental concepts for efficient data organization and computational problem-solving.
- **System Design:** Principles for architecting scalable, robust, and maintainable software systems.
- **Database Systems:** Theory and practice of designing, managing, and querying relational databases.
- **Software Engineering Principles:** Methodologies and best practices for the full software development lifecycle.

EXPERIENCE

iDATA, Full-Stack Developer Intern 04/2026 – Present | Addis Ababa, Ethiopia

- Architected and deployed backend analytics APIs and 18+ interactive data charts across three role-based dashboards, achieving 0% data leakage through rigorous cross-sector isolation.
- Spearheaded the development of a state-machine-driven reporting system, integrating PKI Digital Signature endpoints and securing critical workflows with role-scoped middleware.
- Led end-to-end workflow integration testing, enabling automated report forwarding to Woreda-tier systems and streamlining cross-departmental processes.

Backend Developer | (2 Years Experience)

- Developed backend systems using Django and Django REST Framework for authentication, user management, and e-commerce platforms.
- Designed and implemented secure RESTful APIs, including authentication, authorization, and role-based access control.
- Integrated and optimized SQL databases, improving query performance and overall backend application efficiency.

PROFILE

Goal-driven Software Engineering student at Addis Ababa Science and Technology University (AASTU) and Full-Stack Developer Intern experienced in building scalable web applications across the full software development lifecycle. Skilled in developing both frontend and backend systems with React, Django, and modern JavaScript/TypeScript tooling, backed by a solid foundation in system design, data structures, algorithms, and RESTful architecture. Currently strengthening backend expertise with NestJS, and known for rapidly adopting new technologies, frameworks, and developer tools to deliver clean, maintainable, user-focused products. Dedicated and goal-driven 4th-year Software Engineering student at Addis Ababa Science and Technology

University, specializing in backend development and full-stack web applications. Strong hands-on experience building scalable systems using Django, Python, PHP, and modern frontend tools such as React and Tailwind CSS.
Currently expanding skills into mobile development with Flutter. Solid foundation in system design, data structures, and algorithms, with strong problem-solving abilities

PROJECTS

- **Oromia Big Data Platform**
  - Distributed and enterprise-scale system built for the Oromia Regional Agriculture sector. The platform uses a microservices architecture and supports multiple users working with agricultural data and services concurrently.
- **Ethiopian Volleyball Management System**
  - A centralized management system developed for the Ethiopian Volleyball Federation to manage multiple volleyball-related services and users. The system supports centralized operations, role-based access, and synchronized activities across different organizational levels.
- **RMS and Planning Management System**
  - A multi-user management system designed for regional-level organizations to handle planning, allocation, and report aggregation. The system supports parallel processing, multi-level workflows, resource allocation, and report management for multiple users and organizational hierarchies.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, PHP, Java, C++, Dart
- **Backend Development:** NestJS, Django, Django REST Framework, Laravel, RESTful API Design
- **Frontend Development:** React.js, Next.js, Tailwind CSS, Responsive Web Design
- **Mobile Development:** Flutter
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & DevOps:** Git, GitHub, Docker, Postman, VS Code
- **Design & UI/UX:** Figma, Google Stitch

CERTIFICATIONS

- **Backend Engineering Certificate** | ALX Africa
- **GDG Certificate**
